Summary of Progress this Report
This week was devoted mostly to the design document, taking some info from our project report. In doing so, we've edited a number of sections to fit the suggestions from grading and to prepare for future steps.

Pending Issues
A small number of code issues will be coming up that need taken care of, and new requirements have been given to us for papers going forward. We'll have to ensure that we meet the new requirements, some of which are simply restated requirements we were already expected to meet.

Plans for Upcoming Reporting Period
The upcoming period will be spent overhauling the project report, as well as taking a look at sections of code in the project that were not completed during the previous week.
