For this week, we worked on getting the next version of the Project Report complete, while also working on what pieces of code were incomplete from the last delegation of tasks.

Pending Issues

Coming up we will need to get the individual bits of code working together, as well as begin looking at new documents to keep track of what we have done and what we will do in relation to new document requirements.

Plans for Upcoming Reporting Period

This next week will be spent planning for future sprints, and making decisions on programming issues we did not see coming. Additionally, we'll need to prepare for the next lightning talk, and make some demo of our project.
