Summary of Progress this Report

This span of time included the release of the final presentation schedule, and a reflection on engineering standards. Due to these two events, our group has begun to work on finalizing documents and tweaking expectations for the next semester's work as we prepare for finals and our presentation.

Pending Issues

Multiple reports are coming up at the same time, and naturally a number of projects and assignments for other classes. Our biggest issue now is finding time for each of the team members to get together and provide meaningful feedback and changes to due reports.

Plans for Upcoming Reporting Period

The upcoming period will be entirely focused on completing the design document and project plan, and finishing the final presentation. Additionally, the team will be meeting with our adviser for a practice run through, and each member is responsible for knowing distinct sections to discuss.
